MOTORIZED ZONE VALVE SERIES ZRS220

The ESBE Series ZRS220 consists of motorized spring return 2-way zone valves available in DN 15-32, PN16 with internal thread connection.

OPERATION

The ESBE Series ZRS220 is a range of 2-way motorized zone valve with spring return actuator for use in heating and cooling system. The valve can easily be manually operated by the lever on the side of the actuator.

The actuator is controlled by 2-point signal with spring return function and is recommended for on/off function, available for 230V AC, 50/60 Hz power supply.

Actuator is assembled on the valve with a screw attachment that allows to assembly/disassembly the actuator in a secure, simple and rapid way even when system is pressurized.

The product is intended to be used in closed circuits only.
